Third places, active partners in smart villages ?

2nd meeting of the European smart villages Pilot Observatory

Marc Laget, ANCT,
Praha (CZ) Sept 27th 2023

Findings

OECD : Virtues of third places identified in rural areas

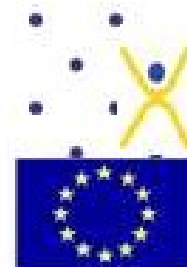

Europe: third places in all countries, several regional programmes and sectoral support (DG Grow, Rural Pact, Joint Research Centre, New Bauhaus)

France: Agenda France Ruralité (villages of the future, smart villages guide with the role of third places).

3,500 Third-Party Sites, €150 million, half of which for sparsely populated areas, 500 structures supported, 18 regional networks
training programme

Support from ERDF, EAFRD,
ESF, Relais Europe, Erasmus+,
EPALE, Interreg, Horizon

Stories of rural third places shared at TP4EU

Arvieu (Fr)
participative
municipality

La Grange (Fr) supports young
people and festive gender
equality

Pré-en-Pail (Fr) relearns
how to renovate locally

Kalenzi (El): the
Tzoumakers build shared
agriculture

Mazovia (Pl): a
collective cultural centre
brings a garden city to
life

Lormes (Fr): innovation in
every field

From citizens' initiatives to public
policy, Montpellier, France, 7-9
June 2023

Fundao (Pt): the Fab Lab,
the cornerstone of an
ambitious economic
development policy

Sparta (El): regenerating
farming for agriculture
and nature

Vuollerim (SE): the
entrepreneurial village

Sansepolcro (It)
Shared culture at the
CasermArcheologica

Support from ERDF, EAFRD,
ESF, Erasmus+ Relais Europe,
EPALE, Interreg, Horizon

Lessons from collective innovation in rural areas

Collective intelligence for
creativity and innovation

Global understanding of the
sum of individual interests

Empowerment of
individuals, empowerment,
emulation, emancipation

Reappearance of
positive-sum and
shared-sum games

Access to
technology
appropriate

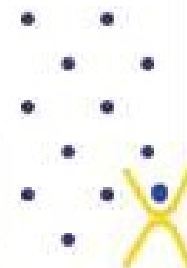

*Applications: citizenship,
culture, solidarity, local
production, teleworking,
coworking, repair cafés
ressourceries professional
flexibility, mobile fab labs/living
labs, incubators/accelerators,
education and training, access
to technologies, circular
economy, intersectoral
collaboration agriculture crafts
tourism*

Participative decision-making
to generate commitment,
shared leadership

Ongoing monitoring of
adaptability: experiments,
feedback, feedback

Networking and sharing of
solutions recipes, rights,
methods, algorithms, metadata,
data, etc.

Creation of common
assets, shared economies
of scale

How can "local factories" serve smart villages?

- Bringing together players to meet the challenges of new technologies for production, marketing and distribution
- Rehabilitating the know-how and skills of local industries
- Relocating employment to local areas
- Developing local production, the circular economy and reuse
- Developing distributed manufacturing
- Pooling investment around key local development issues: digital tools, databases, recipes, feedback, websites with shared resources, free access or accessible rates, participation in professional meetings, model statutes and contracts, agile methods (do it yourself, peer-to-peer, design thinking, living labs, etc.), etc.
